

OUT-OF-COMMUNITY-POT SEEDLINGS, READY FOR INDIVIDUAL POTS

If growing your own community pots, as suggested on Page 5, strikes you as being too difficult; or if a whole community pot would be more seedlings of one cross than you could use; here's your chance to buy Bare Root seedlings ready for individual 1½ or 2-inch pots. (See Pages E and T.)

Any 10 Bare Root seedlings on this page (Your Choice).....\$ 6.00  
THEY FLY TO YOU, AIR MAIL PREPAID!

PLEASE NOTE: MINIMUM ORDER IS 10 SEEDLINGS, BUT IF YOU BUY 15 OR MORE, THE PRICE IS STRAIGHT 50¢ EACH, SO 15 SEEDLINGS COST ONLY \$1.50 MORE THAN THE FIRST TEN WOULD HAVE COST YOU. 15 SHIP AS EASILY AS 10:

#72-R LC MEM. REMY CHOLET X LC PRINCESS MARGARET - Should produce large, dark red-lavender blooms with glowing crimson lips and small gold eyes. Expect this cross to bloom twice yearly, Spring and Fall.

#73-R BLC DAWN ANGELA X LC GOVERNOR GORE - Both these parents are exhibition type hybrids, with bold form, heavy texture, good size and brilliant color contrast. Winter.

#74-R C. TITRIANAE X LC DERRYANE - Large, well formed flowers with medium lavender sepals and petals, dark purple lip of rich, velvety texture. Some of the flowers should have matching dark petal tips. Late Fall.

#79-R LC WHITEWINGS (C. ENID ALBA X LC CYNTHIA ALBA) - Extra fine White-Colored-Lip hybrid, large and crisp textured; some with mottled purple lips; others with lower half of lip solid red-purple. Twice yearly.

#696 BLC IRENE X LC CROWBOROUGH X LC LINNAEUS T. SAVAGE - Twice yearly blooming; bright rose sepals and petals with very ruffled and frilled crimson purple lips.

#711 LC BRITANIA ALBA X LC PARIZADE ALBA - Spring blooming White-Colored-Lip hybrids are always in demand for Graduation, Easter, Mother's Day, etc., and these should fill the bill. Both parents large, well formed, with crisp, heavy texture.

#730 C. ISORA NADALANI X BLC MARION RYERSON VAR REDLANDS - The pod parent was bright dark lavender with darker fuchsia fan in lip, topped by gold zone. Fine form and heavy texture. Variety Redlands is one of our darkest and most brilliantly red-lavender of the Marion Ryerson. Winter or twice yearly.

#734 C. REMY CHOLET X LC ST. GEORGES X BLC MARION RYERSON VAR REDLANDS - If anything, this cross should produce even darker blooms than the above, as the unnamed pod parent was very dark with vivid red-purple in lower half of lip. Nice round form and crisp heavy texture. Winter or twice yearly.

#738 C. FLORENCE PATTERSON X BLC KENNETH ALBA - Large, heavy textured pure white Florence Patterson, crossed with the white "brasso" type pollen parent should produce some very fine white brassos of excellent form and substance. Spring or twice yearly.

#739 C. IVA WITHERS X BLC MARION RYERSON VAR. HARTLAND - The Iva Withers used is a very large, dark, free-flowering hybrid of good form and texture. Vivid, red-fuchsia lips with color coming up sides to top of throat. Fuchsia veined gold in throat. This Marion Ryerson follows the form and coloring of Bc Hartland so closely that many, at first glance, think it is Hartland. Winter or twice yearly.

SPECIAL BONUS: Mail your order for 10 or more of the above seedlings within 10 days of date list is received and you will receive a BONUS or PREMIUM of an additional seedling not listed here. It will be a correctly tagged YELLOW or RED hybrid of my choice. (Please state color preference.)

DANIEL RYERSON, BOX 805, HOMESTEAD, FLA.
